Strategy overview and ambitions

- Today marks the launch of our new five-year strategy

Ambitions:

1. To give every person the best care, every time
2. To be a great place to work
3. To use our resources wisely
4. To make our hospital and buildings fit for the Future
5. To join-up services to improve the health of the people of Bolton
6. To develop partnerships across Greater Manchester to improve services

Our Pledge – as part of our engagement when developing the strategy, we asked the public what was most important to them. Our community told us that they wanted us to:

- Improve our communication with them
- Use technology where we can

- Make sure we deliver the best quality of care
- Reduce waste and duplication
- Work more closely with other services

Within this strategy, we are therefore making a pledge to the public that we will listen to this feedback and use it in developing our services. Quality will be at the centre of everything we do, and we will focus on people's strengths and assets to enable them to live happy, healthy lives. We are asking the public to continue helping us to develop as an organisation, and this strategy is the start of a partnership with the public of Bolton where we will work together "For a better Bolton".

Our time to listen...
