

CAT C PERMIT APPLICATION STATEMENT

The above application will enable a Video AWP machine to be sited that conforms to legal requirements and Gambling Commission guidance. It is a relatively new product in the leisure industry. The machine has a suite of games. The machine can have new games either downloaded over a phone line or by replacing the hard drive.

It is the intention to replace an existing non CAT C machine, so the actual number of machines sited in the outlet remains the same.

As a company we constantly look at supplying our guests with the latest innovation in electronic leisure. In recent years we have utilised such machines as Golf games and Touch Screen strategy games, these initially proved popular but over recent times there has been a steady decline in there usage. Our guests like to see new products and the Video AWP is a new development that is proving popular with both male and female guests and interestingly does not really appeal to regular AWP players. The ability to utilise video graphics on features means a longer game and more fun and entertainment.
